971TSP — Tyre pressure sensor tool

TECHNICAL DATA
Processor: Cortex M0+, 48 MHz
Display: 1.5" LCD, backlit
Resolution: 64x128
Cable communication: USB
Wireless communication: Bluetooth, class 2, with integrated antenna
Battery: Li-ion type, capacity 1100 mAh, voltage 3.7V
Life: ca. 8 hours
Recharge: via USB, ca. 3 hours
Updates: periodic updating of vehicle database after first year

g

63x142x30 mm

SPECIFICATIONS
• reading of TPMS sensor information, including:
sensor ID
inflation pressure
temperature
battery state
• sensor activation
• universal sensor programming

The tool has a database which supports repair operations, including:
• driving torques
• codes of original spare parts and compatible universal sensors

Includes over 50 brands of vehicles

Universal sensor programming

One-year updates included
